Practical work sessions start at 15:30 or at 16:15!

	Monday, November 12	Tuesday, November 13	Wednesday, November 14	Thursday, November 15	Friday, November 16
LABORATORY OF BIOCYBERNETICS	**Electrochemotherapy treatment planning: optimization of voltage and electrode position** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants) **Numerical modeling of electric field in a cell suspension** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)	**Electrochemotherapy treatment planning: optimization of voltage and electrode position** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants) **Numerical modeling of electric field in a cell suspension** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)		**Electrochemotherapy treatment planning: optimization of voltage and electrode position** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants) **Numerical modeling of electric field in a cell suspension** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)	**Electrochemotherapy treatment planning: optimization of voltage and electrode position** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants) **Numerical modeling of electric field in a cell suspension** (numerical modeling) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)
CELL CULTURE LABORATORY 1	**Gene electrotransfer with different electric field orientations** (in vitro experiment - 2 day experiment) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)			**Monitoring cell membrane electropermeabilization with ratiometric fluorescence dye FURA-2AM** (in vitro experiment) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)	**Monitoring cell membrane electropermeabilization with ratiometric fluorescence dye FURA-2AM** (in vitro experiment) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)
CELL CULTURE LABORATORY 2	**Electropermeabilization detection with propidium iodide** (in vitro experiment) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)	**Electropermeabilization detection with propidium iodide** (in vitro experiment) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)		**Electric field orientation and uptake of propidium iodide** (in vitro experiment) 15:30-16:15 (4 participants) 16:15-17:00 (4 participants)	
COMPUTER ROOM				**Electrochemotherapy - interactive learning** (e-learning) 15:30-17:00 (18 participants)	**Electrochemotherapy - interactive learning** (e-learning) 15:30-17:00 (18 participants)
INSTITUTE OF ONCOLOGY					**Electrochemotherapy with cisplatin of solid tumors in mice** (in vivo treatment) 15:30-17:00 (8 participants)
